Integrate Unity Ads into your mediation platform

1. Follow the instructions in the [Unity Ads Mediation Integration Guide](#). You might need to reference the following IDs:

Organization Core ID

4674147710013

Game ID

6154440

6154441

Monetization Stats API Key

896624fb2cd9ba115e9be090a659b7e42fd0a5f
b00f6c41242914ed8acde2b73

2. Ensure that you use the latest version of **Unity Ads SDK** ([iOS](#) or [Android](#)) and **Adaptor** ([iOS](#) or [Android](#)). If you are using the **Unity Editor**, see [how to install the Unity SDK](#).

[Print the instructions](#)

[Finish](#)

Maximize your earning opportunities by integrating the Unity Ads network into your mediation setup through Unity LevelPlay or another mediation partner. You can also integrate Unity Ads on its own and use this dashboard for:

- **Using engaging ad formats** - select the right ad formats to enhance your players' experience. Rewarded, interstitial and banner ads are supported.
- **Creating and managing placements** - connect an ad unit to its specific settings and configurations.
- **Reporting on performance** - review revenue, impressions, eCPM, and fill rate data. Filter by date range, time, platform, country, placement and content type.
- **Controlling ad quality and experiences** - protect your brand safety by managing the advertisers and ad content shown in your game.

SUCCESS STORIES

Qcplay increases ad ARPDAU with bidding

Discover how Qcplay boosted ad ARPDAU 29% for their idle-RPG Super Snail using the Unity Ads bidder.
